	Chapter 4 - Loop Control Instruction
	Why Loops
	Sometimes we want our programs to execute few set of instructions over and over again for ex: printing 1 to 100, first 100 even numbers etc.
	of instructions over and over again for ex:
	printing 1 to 100. first 100 even numbers etc.
	Hence Loops make it easy for a programmer to tell computer that a given set of instructions must be executed repeatedly.
1	tell computer that a given set of instructions
	must he executed subsertedly
	I'ms i we viermed reporting.
	Tuber of Joseph
	Types of Loops
	primority, mere will three types of pops in C
	Primarily, there are three types of loops in C Language:
7	Id While 1900 as at top take selected god and
27	do-While Joop
37	
	represent and devicement operation
in the	We will look into these one by one
	had becarded 21 to another the lead of
	While loop and benefits in the
10%	TYTIMU TOOP
	While (condition is true) 2
	WILL WHAT HOTE IS I WE I
	1/ Code The block keeps executing
	The contract of the contract o
	as frule fraid
	3
	This you'd brooks I and then decreased it
